UNIT III

5. (a) Read the following passage and answer the questions given at the end of it : 10

The earth's crust is the major source of metals. Seawater also contains some soluble salts such as sodium chloride, magnesium chloride, etc. The elements or compounds which occur naturally in the earth's crust are known as minerals. At some places, minerals contain a very high percentage of a particular metal and the metal can be profitably extracted from it. These minerals are called ores. Some metals are found in the earth in the Free State. Some are found in the form of compounds. For example, gold, silver, platinum and copper are found in the Free State. The metals such as zinc, iron, and lead are present as sulphides or carbonates in nature.

Questions :

1. Where can we find metals ?
 2. What are minerals ?
 3. Which metals are found in Free State ?
 4. Write the word synonymous to :

Man had few necessities of life in the beginning. He invented a number of things to fulfill his necessities. When he felt hungry, he went in search of food and killed animals with the tools made by him. When he felt cold, he wore animal skins. He prepared caves or made houses for his protection from heat, cold, rain and wild animals. As the time advanced man started

farming and thousands of things which he needed. New means of transport and communication came into being to reduce distance. New means of production in fields and factories came into existence to meet the requirements of people. New medicines were invented to relieve man from sickness. Thus the increase in necessities led man to make inventions, which gave birth to modern civilization.

Questions :

- (i) What did man do to fulfill his necessities ?
 - (ii) What did man do to protect himself from cold ?
 - (iii) Why did man kill animals in the beginning ?
 - (iv) What inventions were made to reduce distance ?
